PROFESSIONAL SUMMARY

Senior Full-Stack WordPress Developer with 5+ years building and scaling high-traffic websites and custom web platforms end to end, from database schema and PHP backend logic through to React front-ends and production deployment. Specialised in custom WordPress theme and plugin development, WordPress REST API and headless architectures, WooCommerce, and third-party API integrations. Track record of leading full rebuilds of national-level platforms, owning server setup and migrations on AWS, leading small development teams, and delivering measurable gains in page speed, Core Web Vitals, and organic search performance.

CORE FULL-STACK CAPABILITIES

- **Backend:** Custom PHP application logic, WordPress plugin architecture, hooks and filters, custom database tables, MySQL query optimisation, authentication and role-based access control.
- **Frontend:** Custom WordPress theme development from Figma, React.js components, TypeScript, JavaScript (ES6+), Tailwind CSS, responsive and cross-browser implementation.
- **APIs & Integrations:** WordPress REST API, RESTful services, webhooks, payment gateways, Google Sheets API, WebEngage, Supabase, including headless/decoupled content delivery.
- **DevOps & Deployment:** AWS, Hostinger, GoDaddy, server management, DNS and SSL configuration, staging-to-production migrations, Git-based workflows and code review.
- **Performance & Security:** Core Web Vitals optimisation, caching and asset strategy, conditional asset loading, technical SEO, WordPress hardening and security best practices.

PROFESSIONAL EXPERIENCE

Electronics and Computer Software Export Promotion Council (ESC) **Jul 2025 – Present**

Senior Web Developer | escindia.in, indiasoft.org, indiaelectronicsexpo.com, escawards.in

- Led end-to-end redevelopment of four official ESC platforms from scratch on WordPress, covering UI/UX, custom theme architecture, PHP backend logic, performance, and long-term maintainability.
- Architected and delivered a B2B Meeting Portal for international exhibitions, enabling delegates to discover and book meetings with exhibitors via filters, functional tags, and categories.
- Designed a unified login system using passport-number authentication, giving delegates a single identity across profiles and companies and replacing a fragmented multi-step onboarding process.
- Built custom PHP-based dashboards, including the ESC Accelerator platform, handling backend logic, data flow, and admin-level access controls.
- Implemented bulk data ingestion workflows pushing exhibitor and company data from Excel into a structured Supabase database for real-time access, and migrated legacy event data while preserving historical records.
- Managed a cross-functional team of 2 developers and one marketing agency, owning sprint planning, code review, and delivery timelines against business goals.
- Integrated Ninja Forms with automated data pipelines to sync submissions to Google Sheets and internal databases, eliminating manual lead handling.

iDreamCareer.com **May 2021 – Jul 2025**

WordPress Developer | Full-Stack WordPress, Custom Development, Performance

- Built and optimised 100+ WordPress landing pages and custom post-type directories, improving content organisation across a high-traffic education platform.
- Developed custom WordPress plugins extending Elementor forms with specialised validation for Indian phone numbers, reducing invalid lead submissions.
- Created a dynamic FAQ platform using the WordPress REST API for centralised content management, and integrated the WebEngage marketing platform via API to track customer engagement.
- Built webhook integrations for streamlined data transmission and lead management between marketing and sales systems.
- Launched exams.idreamcareer.com featuring a full exams directory with 200+ pages and 15 component sub-pages per exam.
- Built faq.idreamcareer.com with REST API integration that automatically pulls main-site blog content into a Q&A format using What, Why, and How question titles.

- Designed logical URL hierarchies (e.g. /engineering/jee-main-exam/syllabus/) to improve crawlability, user navigation, and organic search performance.
- Achieved passing Core Web Vitals for INP and LCP through targeted optimisations across 100+ pages.
- Reduced DOM size, removed unused JavaScript and CSS, and eliminated render-blocking resources; wrote custom PHP functions to conditionally load assets by post type.

TECHNICAL SKILLS

WordPress: Custom Theme Development, Custom Plugin Development, WooCommerce, Elementor Pro, Advanced Custom Fields (ACF), Custom Post Types, WordPress REST API, Headless WordPress, Multisite, Hooks & Filters, Custom Gutenberg Blocks

Languages: PHP, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, React Router, jQuery, Tailwind CSS, Responsive Design, Figma-to-Code

Backend & APIs: Node.js, RESTful APIs, Webhooks, Payment Gateway Integration, Google Sheets API, WebEngage API, Supabase

E-Commerce: WooCommerce, Shopify (Theme 2.0, Liquid, JSON Templates, Admin API, App Development)

Database: MySQL, PostgreSQL, Supabase, Schema Design, Query Optimisation, Data Migration

Cloud & Deployment: AWS, Cloudflare Workers, Hostinger, GoDaddy, Server Management, Website Migration, DNS, SSL

Performance & SEO: Core Web Vitals, Caching, Technical SEO, Google Analytics, Google Search Console, Website Security

Tools & Workflow: Git, GitHub, VS Code, Postman, Figma, Cursor AI, GitHub Copilot, Code Review, Sprint Planning

EDUCATION

Bachelor of Computer Applications (BCA) | Galgotias University
